DETAILED ACTION

1. This Office Action is regarding Applicant's response filed 16 June 2011 to a prior Office Communication. Claims 2, 5 – 15, 18 – 26, 28 and 30 – 38 are pending. Claims 2, 5, 15, 18, 26, 28, 30, 32 and 36 are amended. Claims 1, 3, 4, 14, 16, 17, 27 and 29 are canceled.
2. This Office Action is the **Fourth Action, Allowance**.

Allowable Subject Matter

3. Claims **2, 5 – 15, 18 – 26, 28 and 30 – 38** are allowed.
4. The following is an examiner's statement of reasons for allowance:

Kanne et al. teaches a parameterizable split algorithm dynamically maintains physical records of size smaller than a page which contain sets of connected tree nodes. This not only improves efficiency by clustering sub-trees but also facilitates their compact representation.

Hoff teaches a computer system and method edits a hierarchical document that has start tags and end tags and leaf contents between ones of the start tags and end tags. The computer system includes a memory, a user interface, and a hierarchical document editor. The memory stores a data structure representing the hierarchical document. The data structure includes an array of items and a corresponding index and a corresponding index offset for each of the items.

In the Decision issued by Board of Patent Appeals and Interferences on 21 January 2011, the BPAI states on page 8,

Art Unit: 2168

Although the Appellants incorrectly identify the array of van Hoff that the Examiner relies on to teach the claimed node slot array of pointers as aforementioned, we agree with their underlying logic. The Examiner already relied on van Hoff's pointer array 206 to teach the independent claims' node slot array of pointers. He cannot rely on the same pointer array to teach the dependent claims' array of record slot pointers. Therefore, we conclude that the Examiner erred in finding that van Hoff teaches at least one page comprising a plurality of record slots, wherein each record slot includes a pointer pointing to a record stored on the page as required by claims 5, 18, and 30.

As such, Hoff fails to explicitly teach that at least one page comprising a plurality of record slots, wherein each record slot includes a pointer pointing to a record stored on the page in independent claims 5, 18 and 30. For these reasons, **claims 2, 5 – 15, 18 – 26, 28 and 30 – 38 are allowed**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Garrett Smith whose telephone number is (571)270-1764.
